PERPETUAL INNOVATION

LENEL

A UTC Fire & Security Company

A Networked World

Today's customers demand flexibility and expandability while maintaining the highest standards of security and accountability within an organization's operating environment. Although secure transmission has been a cornerstone of closed-circuit video systems for decades, the nature of closed systems is losing momentum in an evolving global market. As organizations expand, intricate video solutions must be available in an always-on, access-anywhere environment.

Network and IP video solutions provide unmatched flexibility, and offer countless benefits for organizations seeking the utmost in video technology and operating efficiency. Lenel's video solutions offer dramatic web-enabled live and recorded video viewing, allowing real-time access to secure networks of video across the globe. Supporting the highest standards of network security, Lenel's network and IP video products allow organizations of all sizes to implement full-scale video solutions that can be controlled from a single secure monitoring facility, or anywhere that secure network access is available.

From global enterprise systems with thousands of cameras, to smaller, closed networks of single camera stations, OnGuard's video solutions offer the most flexible, advanced, and modern technologies available on the global security market.

Overview

Video security requires more than simply combining hardware with software. It is the creative implementation of an intelligent blend of unique technology tailored to the exact needs of an organization's visual security requirements. Breakthrough technologies such as video analytics and ultra-secure network communications give organizations unparalleled flexibility and control. OnGuard video solutions of all sizes offer intricate **alarm integration, investigative analytics, event-driven recording, and total system management.**

Software Enabling the Enterprise

Today's video demands require advanced software solutions. OnGuard solutions offer unlimited possibility for any video implementation. As Lenel continues to drive interoperability of video servers and cameras, the importance of Lenel's OnGuard software as the differentiating factor greatly increases. OnGuard video solutions are built using an award-winning open-architecture design that promotes ultimate flexibility in deployment. Advanced linkage capabilities and data routing for storage are becoming standard requirements for video. From web-based video viewing applications to futuristic IntelligentVideo analytics, OnGuard video solutions place no limits on imagination.

Smart Analytics from Anywhere in the World

OnGuard video solutions are powered by strong analytical tools such as IntelligentVideo, forensic watermarking, frame encryption, and live monitoring of any feed within a system. OnGuard IntelligentVideo solutions offer the most advanced analytical capabilities on the video market. IntelligentVideo provides organizations with intricate methods for implementing ultra-high security procedures. Packages include facial detection, directional motion capturing, color-based analytics, crowd control & group monitoring, loitering & immobile object detection, weather recognition, and much more. Whether a camera is monitoring for smoke and fire or an administrator needs video feed access from a remote location miles away from the organization, OnGuard video solutions make detailed proactive analysis and monitoring easy and efficient.

Ease of Management

OnGuard VideoManager is the most flexible and dynamic video system available today. OnGuard VideoManager offers customers the scalability to grow small, simple video systems into large, sophisticated enterprise video configurations. OnGuard VideoManager can be seamlessly integrated with OnGuard, offering customers the many benefits of applications inside the OnGuard portfolio, including OnGuard Access and OnGuard Fire & Intrusion. By integrating with these products, customers can realize a true, event-driven system architecture whereby actionable security is enabled by linking real, live security-related events.

Unlimited Expansion

Scalable solutions aren't just about system size, but also system potential. OnGuard video solutions offer integration into a variety of external and internal system software and hardware modules. With an unlimited number of supported cameras, it is important to also allow third-party modules access to the strengths of OnGuard's video portfolio... such as advanced storage solutions. Whether analog or digital, closed-circuit or over a large IP network, Lenel offers hardware storage solutions that can manage the most advanced video solutions in the world.

Worldwide Web, Worldwide Video

OnGuard's web-based video viewer application makes controlling and viewing live video easier than ever before. Users can access video feeds from any capable PC, anywhere in the world without installation of client software. OnGuard's web-based video viewing architecture allows any security organization to efficiently and easily manage video feeds from one single web-based application. And a video solution is only as strong as its user experience. OnGuard's web-based video viewer brings the "wow" factor back to the user.

Infinite Product Life Cycle

The combination of OnGuard VideoManager with network video recorders gives customers a solution with an unlimited product life cycle. By installing the latest version of the OnGuard VideoManager software, you can easily update your video system to include the latest features and functionality. Your initial investment is never wasted or lost, as is often the case with traditional digital video recorder solutions.

Lenel Video Hardware

Lenel's line of video hardware includes top-of-the-line digital and network video recorders, network-based cameras, and audio/video decoding devices. Fully compatible with many third-party video applications, Lenel-branded hardware is an easy choice for security professionals around the world. The Lenel brand reflects a history of award-winning technology, first-class support, and superior quality in all its products.

Coopetition Through an Open Platform

OnGuard video solutions provide easy integration with many popular video standards. OnGuard is THE video platform, supporting industry leading products through strong partnerships and alliances. OnGuard supports first-rate brands of imaging devices, video server technology, and integration software solutions, offering unparalleled compatibility with technology devices available in the market. Additionally, Lenel's Open Access Alliance Program attracts partners with offerings as diverse as video analytics hardware, intelligent IP cameras, and massive structural walls of video feeds. In all, OnGuard's video solutions give customers the freedom of choice, allowing them to utilize their existing infrastructure and deploy best-in-breed products throughout their security operational environment!

With a complete suite of scalable video solutions, Lenel is the leading source for any organization's video needs.
